

UltraLite Equipment Pad

New Mini-Split Pad Size for Larger Equipment

A true concrete equipment pad at the weight of plastic (about 2.5 lbs. per square foot).

UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating. This fiber allows the pad to flex instead of cracking or breaking. The textured surface prevents the condensing unit or portable generator from sliding, and allows water drainage, while the engineered encapsulated polystyrene (EPS) core prevents warping and provides a solid bottom to resist settling. Unaffected by soil conditions, ultraviolet (UV) light, temperature extremes, and other weather conditions.

New, larger 18 x 38 inch size pad is ideal for mini-split condenser units.
