

Specifications

- Product** Touchscreen Thermostat
- Application** Home HVAC system control
- Purpose** The Touchscreen Thermostat is an elegantly powerful touchscreen room thermostat that reduces the operating cost of an HVAC system.
- Advantages** Featuring a unique and easy to use touchscreen interface, where the menu options and available buttons change intuitively. It is also US DOE Energy Star rated, which for the user means reduced operating costs of the HVAC system by programmably altering temperature set point based on room occupancy patterns. Also included is Energy Watch - a unique way of displaying the total operating cost of the HVAC system. The convenient 2-wire model allows for the retro-fit of a Touchscreen Thermostat into installations where only 2 wires are available from the air handler to the thermostat location.
- Display Options** Scratch resistant dot matrix screen showing simple or dynamic displays with virtual buttons. Negative image and automatic nighttime display, fahrenheit or celcius, outdoor temperature, humidity (675-TS32H), filter monitor, clock/date and custom installer message.
- Automatic Features** Automatic daylight savings changeover, temperature control, humidity control (675-TS32H) and fan modes.
- Fan Modes** On, automatic, and intermittent (10 minutes every hour)
- Programmability** Fan modes programmable through a 7 day regimen with 4 events per day. Fan mode programmable per event. Programs can be copied day to day.
- Memory** Permanent (non-battery) memory for settings
- Security** Variable security lock
